

6.2.1. The institutional Strategic/ perspective plan is effectively deployed

So far institutional plan is concerned, we are adopting a long range plan in collaboration with the state government and also the individuals under the public-private-partnership (PPP) model. As a part of it, we have signed an MOU with Information and Communication Technology (ICT) with a view to impact student learning. Our teachers are digitally literate and they know how to integrate it into curriculum. Now, to impart the students the computer related education this plan is being taken i.e signing of the MoU for the greater interest of the student community.
