HCDG College

Concept Note

Quality in higher education has become the benchmark for socio-cultural and economic development of Nation. The enhancement of quality in higher education has been the prime concern of National Policy of Education, 1986 and its Programme of Action, 1992 in India. Quality is measurement against the standard norm. Quality enhancement is a way of thinking and intrinsic consciousness with holistic vision. Quality in higher education is a multidimensional concept. It embraces different aspects such as curriculum, faculty, teaching and evolution, research and strengthening infrastructure. Quality also requires that higher education should be characterized by exchange of knowledge, technology, scientific ideas, interactive networking, mobility of students and internalization of research. Therefore, National Assessment and Accreditation Council (NAAC) was established as an autonomous body by the UGC on 16th September, 1994 to assess and accredit all the institutions of higher learning. It emphasizes on improving quality, increase effectiveness and continuous strive towards excellence by reviewing and developing higher education quality criteria. ers working in the field of higher education on quality enhancement in higher
