

Report on Seven Day Workshop on Thread making from Banana Tree

Date: 24th June to 30th June 2024

Venue: Education department

Report: A seven day workshop on thread making from Banana Tree was organised by the Department of Education, H.C.D.G. College from 24th June to 30th June 2024 in the department. The programme is organized to foster the talent of students in co-curricular activities and to encourage them to learn productive work like weaving under the mission of IQAC 'earn while you learn'. Mr. Suraj Buragohain, a student of B.A. 3rd Semester along with Debajit Buragohain, 1st semester provided the training and work together with their friend, seniors and juniors. Major students of the department, other departments and a few outgoing students of education department participated in the programme.

In the programme, the students cut the outer sheath that grows around the trunk of banana tree into 5-10 feet long strips. The strips are dried in the sun. Then, the students extract the fiber manually and remove the pulp. The fibers are dried until it feels like a silky yarn. They spin the dried fibers into yarn using the traditional spinning techniques. The yarns are weaving by interested students.
